1. viw yiw p == <C+C C+V>
2. fa found char:a
3. 3fa
4. t. stop till .
5. gd go to the definition

F\T back\ward

visual mode

some basic ideas:

<action>a<object>
<action>i<object>

action can be any operation like : d y v

there is a example:

(map(+)("foo"))
and your point is just at

```
vi" ->foo  
va"->"foo"  
vi) ---> "foo"  
va) ->("foo")  
v2i) map(+)( "foo")  
v2a) (map(+)( "foo"))
```
